30 Years from Here - accounts from the war on HIV/AIDS

here! TV is proud to announce the debut of *30 Years from Here*; real life accounts from the war on HIV/AIDS.

This original, hard-hitting documentary examines the trials and tribulations that the AIDS pandemic has created over the past three decades.

Viewers get an intimate look at how this non-discriminatory disease has affected over 60 million lives worldwide. AIDS has killed more than half this number, and today 1 in 5 gay men in major U.S. cities are living with HIV. The documentary also looks at how the medical treatment of AIDS, as well as the public's education on disease prevention, has changed dramatically over 30 years.
